Public Statement on the Absence of Lobbying

2026 EDITION

At Famille Ravoire, we believe that transparency is the foundation of every relationship of trust, with our customers, partners, employees and society as a whole. In this spirit, we wish to publicly formalise our position regarding lobbying activities.

Famille Ravoire declares that it does not engage in any lobbying activity, understood as any action aimed at directly or indirectly influencing political, legislative or regulatory decisions for the exclusive benefit of its commercial interests.

This includes the absence of:

- financial contributions to political parties or election campaigns;
- mandates entrusted to lobbying firms or interest representatives before public institutions;
- membership of professional organisations for the purpose of exerting coordinated political influence.

This statement, approved by our management team, reflects our conviction that the positive impact we seek to have on society depends on setting an example through our practices, rather than influencing the rules of the game to our advantage.

We prefer to contribute to public debate openly and transparently, by sharing our convictions and learnings with our community, without seeking to influence public decisions outside ordinary democratic channels.

On behalf of the Famille Ravoire management team,

Olivier Ravoire - President
